Vocabulary Review

Short-answer, multiple-choice, and select-all questions about key vocabulary.

Question 1 *An **equilateral quadrilateral** is called a* $\boxed{?}$ *.*

Question 2 *An **equiangular quadrilateral** is called a* $\boxed{?}$ *.*

Question 3 *An **regular quadrilateral** is called a* $\boxed{?}$ *.*

Author(s): Bart Snapp and Brad Findell

Question 4 *An line segment between two points on a circle is called a* $\boxed{?}$ *of the circle.*

Question 5 *A* $\boxed{?}$ *measures* $180°$*. (Hint: Answer with two words.)*

Question 6 *Two angles whose measures sum to* $180°$ *are said to be* $\boxed{?}$*.*

Question 7 *Two angles whose measures sum to 90° are said to be* $\boxed{?}$.

Question 8 *Three (or more) points that lie on the same line are said to be* $\boxed{?}$.

Question 9 *Three (or more) lines that lie on the same point are said to be* $\boxed{?}$.

Question 10 *In a circle, the measure of an* $\boxed{?}$ *angle is* $\boxed{?}$ *the measure of the corresponding central angle. (Hint: For the second blank, answer with a word.)*

Question 11 *An* **altitude** *in a triangle . . .*

Multiple Choice:

(a) *contains the midpoint of the side of a triangle and is perpendicular to that side.*

(b) *contains a vertex of a triangle and is perpendicular to the line containing the other side.*

(c) *contains a vertex of a triangle and the midpoint of the opposite side.*

(d) *contains a vertex and bisects that angle.*

(e) *none of these.*

Question 12 *A **median** in a triangle . . .*

Multiple Choice:

(a) *contains the midpoint of the side of a triangle and is perpendicular to that side.*

(b) *contains a vertex of a triangle and is perpendicular to the line containing the other side.*

(c) *contains a vertex of a triangle and the midpoint of the opposite side.*

(d) *contains a vertex and bisects that angle.*

(e) *none of these.*

Question 13 *The **circumcenter** of a triangle is . . . [select all]*

Select All Correct Answers:

(a) *the point of concurrency of the medians.*

(b) *the point of concurrency of the angle bisectors.*

(c) *the point of concurrency of the perpendicular bisectors.*

(d) *the point of concurrency of the altitudes.*

(e) *the balance point for the triangle.*

(f) *the center in the triangle.*

(g) *the center of the incircle.*

(h) *the center of the circumcircle.*

(i) *equidistant from the sides of the triangle.*

(j) *equidistant from the vertices of the triangle.*

Question 14 *The **incenter** of a triangle is ... [select all]*

Select All Correct Answers:

(a) *the point of concurrency of the medians.*

(b) *the point of concurrency of the angle bisectors.*

(c) *the point of concurrency of the perpendicular bisectors.*

(d) *the point of concurrency of the altitudes.*

(e) *the balance point for the triangle.*

(f) *the center in the triangle.*

(g) *the center of the incircle.*

(h) *the center of the circumcircle.*

(i) *equidistant from the sides of the triangle.*

(j) *equidistant from the vertices of the triangle.*

Question 15 *The* **centroid** *of a triangle is . . . [select all]*

Select All Correct Answers:

(a) *the point of concurrency of the medians.*

(b) *the point of concurrency of the angle bisectors.*

(c) *the point of concurrency of the perpendicular bisectors.*

(d) *the point of concurrency of the altitudes.*

(e) *the balance point for the triangle.*

(f) *the center in the triangle.*

(g) *the center of the incircle.*

(h) *the center of the circumcircle.*

(i) *equidistant from the sides of the triangle.*

(j) *equidistant from the vertices of the triangle.*

Question 16 *The* **orthocenter** *of a triangle is . . . [select all]*

Select All Correct Answers:

(a) *the point of concurrency of the medians.*

(b) *the point of concurrency of the angle bisectors.*

(c) *the point of concurrency of the perpendicular bisectors.*

(d) *the point of concurrency of the altitudes.*

(e) *the balance point for the triangle.*

(f) *the center in the triangle.*

(g) *the center of the incircle.*

(h) *the center of the circumcircle.*

(i) *equidistant from the sides of the triangle.*

(j) *equidistant from the vertices of the triangle.*

Question 17 *A* **midsegment** *in a triangle is ... [select all]*

Select All Correct Answers:

(a) *a segment in the middle.*

(b) *a segment connecting the midpoints of two sides.*

(c) *parallel to a side of the triangle.*

(d) *perpendicular to a side of the triangle.*

(e) *also called a median.*
